

# ELECTRONIC VISIONS, INC.

## Model MRN-200 MESSAGE ROUTING NODE

### MRN-200

The Message Routing Node (MRN) is an Electronic Visions, Inc. product which allows a MODCOMP computer to participate in a TCP/IP LAN or WAN environment.

The MRN uses the 802.3/Ethernet Multivendor LAN Standard. This will provide, modular growth, which enables you to expand your computing resources. The MRN is flexible enough to accommodate a variety of industry standards (ISO or DNA).

The MRN provides both TCP and UDP communication services. A task on the MODCOMP can communicate with a task executing on a processor connected to the Ethernet LAN. The MODCOMP task can participate in either a server or client mode. The MRN will support up to fifteen concurrent LAN connections.

The MRN also provides an internal protocol for diagnostics and configuration information from the MRN. This includes a PING command which may be used to test a network path from the MRN to another system.

### SOFTWARE (SUPPLIED)

#### MODCOMP:

MRN Symbiont (16 or 32 bit)  
Interface Routines (FORTRAN)

#### MRN-200:

MS-DOS®  
TCP/IP Kernel  
EVI 5316 Driver  
MRN-200 Application Software

### HARDWARE (SUPPLIED)

#### MRN-200:

Rack-mountable industrial computer equipped with  
an EVI 5316 interface card and an ethernet card.  
EVI 5316 Cable
